

API of Admitix

Admitix API Endpoints

1.Authentication

Method	Endpoint	Description
POST	<code>/auth/register</code>	Register a new user.
POST	<code>/auth/login</code>	Authenticate user and generate access token.
POST	<code>/auth/logout</code>	Logout the authenticated user.
POST	<code>/auth/refresh-token</code>	Refresh the access token.
POST	<code>/auth/forgot-password</code>	Initiate password reset process.
POST	<code>/auth/reset-password</code>	Reset password using a valid token.
POST	<code>/auth/change-password</code>	Change the current user's password.
GET	<code>/auth/me</code>	Retrieve the authenticated user's profile.

2.Users

Method	Endpoint	Description
POST	<code>/users</code>	Create a new user.
GET	<code>/users</code>	Retrieve all users (supports search, filter, sorting & pagination).
GET	<code>/users/{id}</code>	Retrieve a specific user by ID.
PUT	<code>/users/{id}</code>	Update user details.
PATCH	<code>/users/{id}/status</code>	Activate or deactivate a user account.
DELETE	<code>/users/{id}</code>	Soft delete/archive a user.

3.roles

Method	Endpoint	Description
POST	<code>/roles</code>	Create a new role.
GET	<code>/roles</code>	Retrieve all roles.
GET	<code>/roles/{id}</code>	Retrieve a role by ID.
PUT	<code>/roles/{id}</code>	Update role details.
DELETE	<code>/roles/{id}</code>	Delete a role.

4.Institutions

Method	Endpoint	Description
POST	<code>/institutions</code>	Register a new institution/college.
GET	<code>/institutions</code>	Retrieve all institutions (supports search, filtering, sorting, and pagination).
GET	<code>/institutions/{id}</code>	Retrieve institution details by ID.
PUT	<code>/institutions/{id}</code>	Update institution information.
DELETE	<code>/institutions/{id}</code>	Soft delete/archive an institution.

5.Faculties

Method	Endpoint	Description
POST	<code>/faculties</code>	Create a new faculty.
GET	<code>/faculties</code>	Retrieve all faculties (supports search, filtering, sorting, and pagination).

Method	Endpoint	Description
GET	<code>/faculties/{id}</code>	Retrieve faculty details by ID.
PUT	<code>/faculties/{id}</code>	Update faculty information.
DELETE	<code>/faculties/{id}</code>	Delete a faculty.

6. Departments

Method	Endpoint	Description
POST	<code>/departments</code>	Create a new department.
GET	<code>/departments</code>	Retrieve all departments (supports search, filtering, sorting, and pagination).
GET	<code>/departments/{id}</code>	Retrieve department details by ID.
PUT	<code>/departments/{id}</code>	Update department information.
DELETE	<code>/departments/{id}</code>	Delete a department.

7. Courses

Method	Endpoint	Description
POST	<code>/courses</code>	Create a new course.
GET	<code>/courses</code>	Retrieve all courses (supports search, filtering, sorting, and pagination).
GET	<code>/courses/{id}</code>	Retrieve course details by ID.
PUT	<code>/courses/{id}</code>	Update course information.
DELETE	<code>/courses/{id}</code>	Delete a course.

8. Admission Cycles

Method	Endpoint	Description
POST	<code>/admission-cycles</code>	Create a new admission cycle.
GET	<code>/admission-cycles</code>	Retrieve all admission cycles (supports search, filtering, sorting, and pagination).
GET	<code>/admission-cycles/{id}</code>	Retrieve admission cycle details by ID.
PUT	<code>/admission-cycles/{id}</code>	Update admission cycle details.
PATCH	<code>/admission-cycles/{id}/status</code>	Open, close, or update the admission cycle status.

Method	Endpoint	Description
DELETE	<code>/admission-cycles/{id}</code>	Delete an admission cycle.

9.staff

Method	Endpoint	Description
POST	<code>/staff</code>	Create a new staff member.
GET	<code>/staff</code>	Retrieve all staff members (supports search, filtering, sorting, and pagination).
GET	<code>/staff/{id}</code>	Retrieve staff details by ID.
PUT	<code>/staff/{id}</code>	Update staff information.
PATCH	<code>/staff/{id}/status</code>	Activate, deactivate, or update staff status.
DELETE	<code>/staff/{id}</code>	Soft delete/archive a staff record.

10.students

Method	Endpoint	Description
POST	<code>/students</code>	Register a new student.
GET	<code>/students</code>	Retrieve all students (supports search, filtering, sorting, and pagination).
GET	<code>/students/{id}</code>	Retrieve student details by ID.
PUT	<code>/students/{id}</code>	Update student profile information.
PATCH	<code>/students/{id}/status</code>	Update student status (Active, Inactive, Graduated, etc.).
DELETE	<code>/students/{id}</code>	Soft delete/archive a student record.
POST	<code>/students/bulk-upload</code>	Import multiple student records using Excel/CSV.
GET	<code>/students/export</code>	Export student records in Excel/CSV format.

11.Education Details

Method	Endpoint	Description
POST	<code>/education-details</code>	Add educational qualification details for a student.

Method	Endpoint	Description
GET	/education-details	Retrieve all education records (supports filtering and pagination).
GET	/education-details/{id}	Retrieve education details by ID.
PUT	/education-details/{id}	Update educational qualification details.
DELETE	/education-details/{id}	Remove/archive an education record.

12.Entrance Exam Scores

Method	Endpoint	Description
POST	/exam-scores	Add entrance examination scores.
GET	/exam-scores	Retrieve all exam scores (supports search, filtering, sorting, and pagination).
GET	/exam-scores/{id}	Retrieve exam score details by ID.
PUT	/exam-scores/{id}	Update entrance exam scores.
DELETE	/exam-scores/{id}	Delete/archive an exam score record.

13.Applications

Method	Endpoint	Description
POST	/applications	Create a new admission application.
GET	/applications	Retrieve all applications (supports search, filtering, sorting, and pagination).
GET	/applications/{id}	Retrieve application details by ID.
PUT	/applications/{id}	Update application details.
PATCH	/applications/{id}/submit	Submit an application for review.
PATCH	/applications/{id}/verify	Verify submitted application.
PATCH	/applications/{id}/approve	Approve the application.
PATCH	/applications/{id}/reject	Reject the application with remarks.
PATCH	/applications/{id}/cancel	Cancel an application.

Method	Endpoint	Description
POST	<code>/applications/bulk-approve</code>	Approve multiple applications simultaneously.
POST	<code>/applications/bulk-reject</code>	Reject multiple applications simultaneously.
GET	<code>/applications/export</code>	Export application records.

14.application preferences

Method	Endpoint	Description
POST	<code>/application-preferences</code>	Add course and college preferences for an application.
GET	<code>/application-preferences</code>	Retrieve all application preferences (supports filtering and pagination).
GET	<code>/application-preferences/{id}</code>	Retrieve preference details by ID.
PUT	<code>/application-preferences/{id}</code>	Update application preferences.
DELETE	<code>/application-preferences/{id}</code>	Delete a preference record.

15.Document Types

Method	Endpoint	Description
POST	<code>/document-types</code>	Create a new document type.
GET	<code>/document-types</code>	Retrieve all document types.
GET	<code>/document-types/{id}</code>	Retrieve document type details by ID.
PUT	<code>/document-types/{id}</code>	Update document type information.
DELETE	<code>/document-types/{id}</code>	Delete a document type.

16.Documents

Method	Endpoint	Description
POST	<code>/documents/upload</code>	Upload student documents.
GET	<code>/documents</code>	Retrieve all uploaded documents (supports search, filtering, sorting, and pagination).

Method	Endpoint	Description
GET	<code>/documents/{id}</code>	Retrieve document details by ID.
GET	<code>/documents/{id}/download</code>	Download the uploaded document.
PATCH	<code>/documents/{id}/verify</code>	Mark document as verified.
PATCH	<code>/documents/{id}/reject</code>	Reject document with remarks.
DELETE	<code>/documents/{id}</code>	Remove/archive a document.
POST	<code>/documents/bulk-upload</code>	Upload multiple documents simultaneously.

17. AI Verification

Method	Endpoint	Description
POST	<code>/ai-verifications/start</code>	Start AI-based document verification.
GET	<code>/ai-verifications</code>	Retrieve all AI verification results (supports filtering and pagination).
GET	<code>/ai-verifications/{id}</code>	Retrieve AI verification details by ID.
PATCH	<code>/ai-verifications/{id}/approve</code>	Accept AI verification result.
PATCH	<code>/ai-verifications/{id}/reject</code>	Reject AI verification result and request manual review.

18.Application Status History

Method	Endpoint	Description
GET	<code>/application-status-history</code>	Retrieve all application status history records (supports filtering, sorting, and pagination).
GET	<code>/application-status-history/{id}</code>	Retrieve a specific status history record by ID.

18.Fee Structure

Method	Endpoint	Description
POST	<code>/fee-structures</code>	Create a new fee structure.
GET	<code>/fee-structures</code>	Retrieve all fee structures (supports search, filtering, sorting, and pagination).
GET	<code>/fee-structures/{id}</code>	Retrieve fee structure details by ID.

Method	Endpoint	Description
PUT	/fee-structures/{id}	Update fee structure information.
DELETE	/fee-structures/{id}	Soft delete/archive a fee structure.

19. Payments

Method	Endpoint	Description
POST	/payments	Create a new payment transaction.
GET	/payments	Retrieve all payment records (supports search, filtering, sorting, and pagination).
GET	/payments/{id}	Retrieve payment details by ID.
PATCH	/payments/{id}/success	Mark payment as successful.
PATCH	/payments/{id}/failed	Mark payment as failed.
PATCH	/payments/{id}/refund	Process or mark a payment refund.

20. Seat Matrix

Method	Endpoint	Description
POST	/seat-matrix	Create a new seat matrix.
GET	/seat-matrix	Retrieve all seat matrices (supports search, filtering, sorting, and pagination).
GET	/seat-matrix/{id}	Retrieve seat matrix details by ID.
PUT	/seat-matrix/{id}	Update seat matrix information.
PATCH	/seat-matrix/{id}/allocate	Allocate seats to eligible applicants.
PATCH	/seat-matrix/{id}/vacate	Mark allocated seats as vacant.
DELETE	/seat-matrix/{id}	Delete/archive a seat matrix.

21. Notifications

Method	Endpoint	Description
POST	/notifications	Create a notification.

Method	Endpoint	Description
GET	<code>/notifications</code>	Retrieve all notifications (supports filtering and pagination).
GET	<code>/notifications/{id}</code>	Retrieve notification details by ID.
PATCH	<code>/notifications/{id}/read</code>	Mark a notification as read.
DELETE	<code>/notifications/{id}</code>	Delete/archive a notification.
POST	<code>/notifications/send</code>	Send a notification to a single recipient.
POST	<code>/notifications/send-bulk</code>	Send notifications to multiple recipients.

22.Audit Logs

Method	Endpoint	Description
GET	<code>/audit-logs</code>	Retrieve all audit logs (supports search, filtering, sorting, and pagination).
GET	<code>/audit-logs/{id}</code>	Retrieve audit log details by ID.

23. chat history

Method	Endpoint	Description
POST	<code>/chat</code>	Save a new chat conversation or message.
GET	<code>/chat</code>	Retrieve chat history (supports search, filtering, sorting, and pagination).
GET	<code>/chat/{id}</code>	Retrieve chat conversation by ID.
DELETE	<code>/chat/{id}</code>	Delete/archive a chat conversation.

25.dashboard

Method	Endpoint	Description
GET	<code>/dashboard/admin</code>	Retrieve admin dashboard statistics.
GET	<code>/dashboard/student</code>	Retrieve student dashboard information.
GET	<code>/dashboard/staff</code>	Retrieve staff dashboard information.
GET	<code>/dashboard/statistics</code>	Retrieve overall system statistics.

Method	Endpoint	Description
GET	<code>/dashboard/recent-applications</code>	Retrieve recently submitted applications.
GET	<code>/dashboard/pending-verifications</code>	Retrieve pending document verification summary.

26.reports

Method	Endpoint	Description
GET	<code>/reports/admissions</code>	Generate admission reports.
GET	<code>/reports/students</code>	Generate student reports.
GET	<code>/reports/payments</code>	Generate payment reports.
GET	<code>/reports/documents</code>	Generate document verification reports.
GET	<code>/reports/export</code>	Export reports in PDF, Excel, or CSV format.
